REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Upon the present amendment of 06/05/2007, the claimed invention is a process for producing a modified=grafted polyethylene resin under the specified process condition, wherein the melt kneading is carried out in an extruder having two temperature zones such that a temperature in the latter-half melt kneading zone is higher than that in the first-half melt kneading zone.

2. While references of record US 2002/0161131 to Kitano and Patent 4,616,059 to Motooka et al disclose a graft polymerization of polyolefin or polyethylene (see Motooka et al) under melt kneading condition in an extruder, none discloses two melt zones having different temperature in an extruder wherein the temperature in the latter-half melt kneading zone being higher than that in the first-half melt kneading zone.

3. The cancellation of claim 4 is noted.

The search has been updated. None of the prior art teaches the criticality of the melt kneading graft polymerization of polyethylene in an extruder having two temperature zones specified in the amended claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
